

Women  
Build®

# North Shore Women – grab your tool belts!

We are asking you to help make **Women Build 2018** a success.

One week a year, women from all across the United States come together and build homes for families in need. North Shore Habitat for Humanity is celebrating its seventh annual Women Build on **May 5th and May 9th** and we are asking you to join us!

You don't need skills or experience to participate in Women Build, just an open heart and a willingness to help. There will be jobs of all sorts, big and small.

Space will be limited so please RSVP before April 30, 2018.

## What is Women Build?

Women Build (WB) encourages women to make a difference by building homes and communities. Through WB, women learn construction skills, gain confidence at the build site and create hope. WB challenges women from all walks of life to come together to help eliminate poverty housing one home at a time.
